SPECIAL FEATURES

Corium 54 Advanced Cooling Water Treatment

Concentrate is the superior combination of corrosion and scale-inhibiting compounds formulated especially for the effective treatment of today's closed recirculating cooling systems.

- **Corium 54** effectively inhibits corrosion & scaling in closed recirculating cooling systems while working to retard future scale build-up.
- **Corium 54** absolutely will not harm metals, wood and painted surfaces commonly used in cooling systems.
- **Corium 54** extends the working life of equipment and minimizes water consumption – significantly cuts operating and maintenance costs.

OUTSTANDING PROPERTIES

Corium 54 is the advanced water treatment concentrate that :

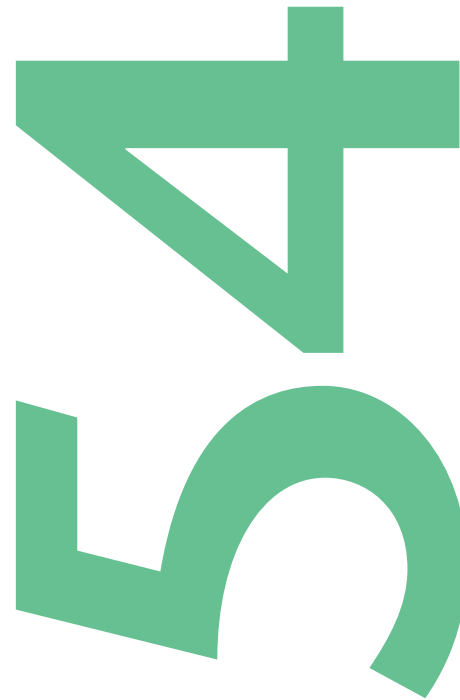

- Is non-acidic and does not contain recirculating water pollutants such as chromates, zinc compounds and other heavy metals.
- Has deep penetration to control the growth of scales – even in microscopic crevices.
- Is compatible with commonly used additives – it will not harm your system.
- Needs no special clothing or equipment for application – will not burn skin or emit toxic fumes.

USE FOR

Corium 54 is the advanced formulation that effectively keeps your water cooling system free from corrosion and power-robbing scale deposits to extend the working life of your costly equipment and significantly reduce your operating and maintenance cost.

Use **Corium 54** confidently to inhibit corrosion and scaling in air-conditioning systems, steam and ammonia condensers, water cooling systems and chillers.

Corium 54 is the dependable, effective and economical scale inhibitor that saves you time and money!
