SPECIAL FEATURES

Corium Z79 "Rust Guard" Metal Protector is a corrosion preventative aerosol that forms a golden brown transparent coating that effectively shuts out rust and all forms of corrosion on machined, smooth or rough metal surfaces.

- **Corium Z79** forms an enduring heavy waxy coating that guards against both physical and chemical damage.
- **Corium Z79** effectively seals out rust and corrosion on virtually all metal surfaces.
- **Corium Z79** is super economical – an extremely thin film is all that's required for long-lasting protection.

OUTSTANDING PROPERTIES

Corium Z79 is the advanced aerosol metal coating and protector that:

- Tenaciously clings to metal surfaces by molecular attraction to provide outstanding protection for up to five years.
- Positively will not flake or crack – easily removed when desired.
- Super easy to apply – just spray on – dries to a clear hard film in minutes.
- Can be applied over wet surfaces – yields maximum protection in areas of high humidity.

USE FOR

Corium Z79 provides physical protection through its highly corrosion-resistant chemical compounds that penetrate the applied area and repel existing moisture. **Corium Z79's** golden brown protective coating then sets to provide a physical barrier to further moisture and rust penetration.

Corium Z79 also provides remarkable chemical protection through its polar active compounds. **Corium Z79** is strongly attracted to metal surfaces to ensure an enduring seal.

Use **Corium Z79** confidently on:

Tools • Dies • Taps • Bits • Machined Parts • All Metal Surfaces in Storage or in Shipment • and more ...

*** Available in bulk as Corium Z790**
