SPECIAL FEATURES

Corium Z80 Advanced Boiler Treatment Compound is the enhanced water treatment for boiler systems that efficiently and effectively controls the many problems associated with the operation of low- to medium-pressure boilers.

- **Corium Z80** provides super convenience – single-package treatment controls many boiler waterside problems.
- **Corium Z80** features a superior formulation – it effectively inhibits the formation of scale and sludge to reduce the need for boiler cleaning.
- **Corium Z80** gives outstanding economy – it significantly controls corrosion in boiler and lines to reduce maintenance and downtime while extending service life.

OUTSTANDING PROPERTIES

Corium Z80 is the advanced boiler treatment compound that :

- Is formulated with a synthetic polymer dispersant that inhibits scale formation by distorting and dispersing insoluble precipitates that form in boiler water.
- Contains an advanced sludge conditioner that helps keep boiler sludge fluid so that it can be purged out of the boiler and water lines through regular blow down.
- Contains superior materials that reduce or inhibit corrosion and passivate water contact surfaces for on-going protection.
- Contains sufficient oxygen-scavenging capacity to control preboiler corrosion.
- Is based on a food-grade formulation approved by the USDA for use in food plants.

USE FOR

Use **Corium Z80** confidently on all low- to medium-pressure waterfeed boiler systems.
