SPECIAL FEATURES

Magna 89 Superior Galvanizing Bar is the special galvanizing alloy that provides year-round protection from rust and corrosion.

- **Magna 89** is a self-fluxing alloy that provides all of the benefits of "hot dipping" without the inconvenience.
- **Magna 89** is easy to use and needs no special equipment or skills.
- **Magna 89** is self-fluxing – even on rusty surfaces.

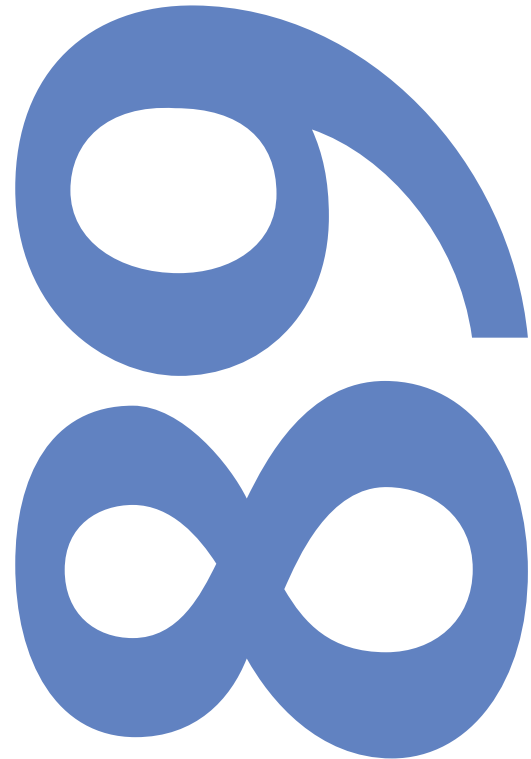

OUTSTANDING PROPERTIES

Magna 89 is the superior galvanizing bar that:

- Is super easy to apply – just melt it onto the surface of the steel being treated.
- Is non-toxic – non-fuming.
- Forms a tenacious oxidation-resistant finish that lasts and lasts.
- Lower on galvanic scale than steel – acts like a "battery" causing corrosion not to attack the steel.
- Continues to protect even when small sections are scratched off.

USE FOR

Magna 89 provides cathodic protection to steel to protect the metal from "Metal Cancer" and significantly reduce costly downtime. **Magna 89** is fully equal to galvanizing in protecting against rust and corrosion. Also excellent as a filler metal on rusty automobiles or truck bodies.
