SPECIAL FEATURES

Omega 991 Lead-Free Valve Protectant is quality engineered to protect engines against premature damage and breakdown due to the use of low-lead or unleaded gasoline (petrol).

- **Omega 991** gives engines the exhaust valve lubrication and protection of leaded gasoline – without the use of lead!
- **Omega 991** is safe for use in vehicles equipped with emission control devices, such as catalytic converters.
- **Omega 991** is organic in nature – absolutely environmentally friendly.

OUTSTANDING PROPERTIES

Omega 991 is the lead-free valve protectant that:

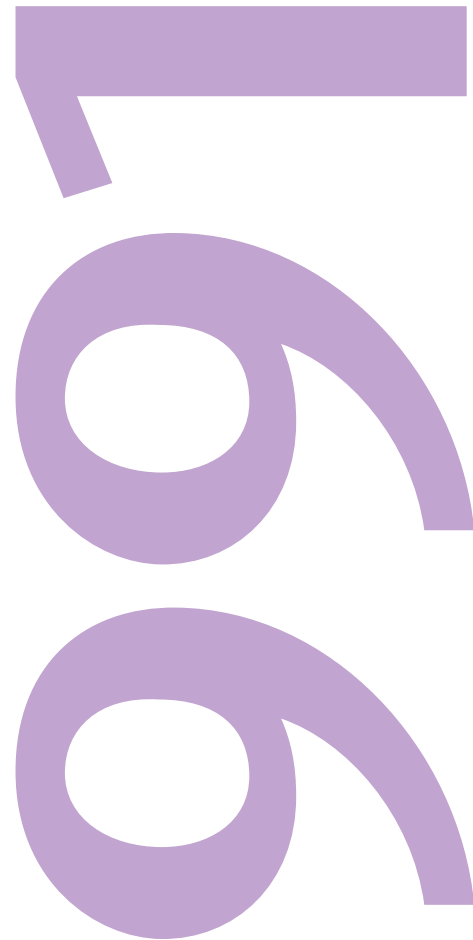

- Can be used effectively in both carburetor or fuel-injected vehicles.
- Contains no dangerous chemicals harmful to engine parts, including electronic sensors and devices.
- Reduces carburetor deposits – cleans the fuel system as well.
- Reduces intake valve and port deposits.

USE FOR

Omega 991 is formulated to provide vehicles using low-lead or unleaded fuel with the same exhaust valve lubrication and protection normally found in leaded gasoline. Also suitable for use with extremely low sulfur diesel fuels.

Omega 991 is completely free of lead, but due to its innovative organic chemistry, provides fully the protection of leaded gasoline to treated engines.

Use **Omega 991** as a supplement to low-lead and unleaded gasoline.
